MANOEUVRABILITY

Room service is an essential part of hotel service which requires quick and easy logistics to transport hot meals to the rooms. Together with the Caddie Room Service tables, the Thermobox is the best solution for quick and efficient room service.

STRENGTH

The Caddie Thermobox, with its monobloc construction in EPP, guarantees a real resistance against physical and thermal impacts, ensuring that dishes can be transported safely and without accidents within the hotel.

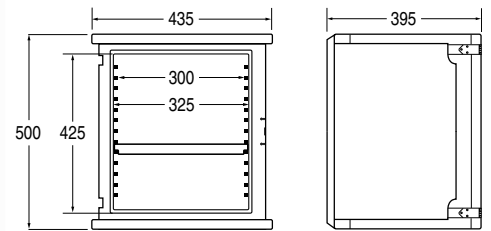

VERSATILITY

The preservation system must ensure that the temperature of the dishes is maintained before they are eaten. The internal space, which can be divided into two halves, means that both cold and hot dishes can be preserved at the same time, providing optimal service.

THERMOBOX

HOTELS

> SAFETY

Expanded polypropylene construction. Suitable for contact with food and guarantees easy maintenance.

> AUTONOMY

No need for an electric connection, easily combined with Caddie Room Service tables.

> ERGONOMICS

Light and recyclable material for flexible use. Stackable boxes make storage easy.

we make it happen

Thermobox

> Range: Hotel equipment. Code number: 9.992.30.45

Features

- **EPP** (expanded polypropylene) **monobloc construction**
- In black
- Suitable for contact with food
- Stacking and storage system on the Caddie Room Service table
- Stainless steel fittings
- For plates up to a diameter of 32 cm
- Simultaneous transport and preservation of hot and cold dishes
- Easy opening / closing
- Weight: 3.5 Kg
- Dimensions:
435/380/510mm

Composition

The code number 9.992.30.45 includes:

- 1 Thermobox
- 1 internal divider in EPP
- 1 stainless steel dividing grill
- 1 heat retention pad
- 1 cold retention pad

Use

- To preserve hot dishes, the heat retention pad is pre-heated in a microwave or steam oven before placing it into the lower section of the box. The plate is placed on the stainless steel grid to avoid direct contact with the heat retention pad.
- To preserve cold dishes, the cold retention pad is placed in the freezer one hour prior to use. It is then slid into the upper section of the box.
